**Daily Maintenance**

- Sweep or blow off leaves, dust, and sand regularly to avoid surface abrasion.
- Rinse with a hose occasionally, especially in dusty or muddy areas.
- Use protective pads or mats under heavy or metal items to prevent rust and scratches.
- Avoid dragging furniture or pots directly across the surface to prevent chipping.

**Sealing**

- Travertine is very porous, and unfilled surfaces have open holes that easily trap dirt and absorb moisture.
- Sealing is essential to protect against stains, algae, and erosion.
- Apply a penetrating/impregnating sealer, specifically for exterior uses.
- Initial sealing should be done during or right after installation.
- Reseal every 6–12 months, depending on climate, use, and foot traffic.
- If you want a darker or “wet look,” use a color-enhancing sealer (always test first).

**Cleaning**

- Clean with a pH-neutral stone cleaner or a mild soap diluted in water.
- Do not use acidic cleaners (vinegar, lemon, harsh grout cleaners), which will etch and damage the surface.
- Low-pressure washing is safe.
- For algae, mold, or mildew, use a stone-safe outdoor biocide or mildew remover—avoid chlorine bleach.
- For stubborn stains, use a poultice specific to the stain type (oil, rust, etc.). Re-seal after treating stains.

***SAI Stone offers a wide range of cleaning and sealing products, as well as glue and grouting solutions. If you need more information or assistance, don't hesitate to reach out!***
